

SHORT DURATION HIGH INCOME FUND

November 30, 2024

ABOUT SHENKMAN

Shenkman Group of Companies manages over \$35.6 billion in assets*, \$6.6 billion of which is in our high yield short duration strategy. The firm was founded in 1985 by Mark Shenkman, a pioneer in leveraged finance. We focus exclusively on analyzing and investing in high yield companies. We have offices in New York, NY, Stamford, CT, Boca Raton, FL, and London, UK.

The Shenkman Group of Companies AUM represents \$32.3bn managed by Shenkman Capital Management Inc. and \$3.3bn managed by Romark Credit Advisors LP and its relying advisors. Assets managed by Shenkman Capital Management, Inc. that are invested in securitization vehicles managed by Romark Credit Advisors LP are included the AUM of both companies, but are included only once when calculating the AUM of the Shenkman Group. AUM calculations include uncalled commitments and gross assets of securitization vehicles. See disclaimers for additional important information on the Shenkman Group of Companies.

SHENKMAN ADVANTAGES

- **Philosophy:** Shenkman focuses first and foremost on capital preservation and avoiding defaults, which in our opinion are the two key drivers of success in short duration high yield.
- **Presence:** Shenkman combines the potential advantages of a \$35.6bn high yield platform with the nimbleness of a \$6.6bn short duration strategy.
- **Depth of Research Team:** Shenkman's 22 member credit research team is organized by sector with each analyst responsible for the entire capital structure and maturity spectrum.
- **Risk Management:** Innovative credit risk analytics that can help to outperform in difficult and uncertain markets.

§ (with transaction costs)

Performance shown for a share class before its inception is based on the performance of the Institutional Class, adjusted to reflect the fees and expenses, and any applicable sales charges of the share class shown.

¹Data as of 11/30/24 is average annual total returns. Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Fund performance current to the most recent month-end may be lower or higher than the performance quoted and can be obtained by calling 1-855-SHENKMAN.

Performance data shown with load reflect the Class A maximum sales charge of 3.00% and Class C maximum deferred sales charge of 1.00%. Performance data excluding the sales charges does not reflect the deduction of the sales charges and if reflected, the sales charges would reduce the performance quoted. The fund imposes a redemption fee of 1.00% on shares held for 30 days or less. Performance data does not reflect the redemption fee. If it had, returns would be reduced.

²Rating Agency: Standard and Poors; All ratings include each tranche within their respective ratings category.

[^]The adviser has contractually agreed to waive a portion of the fund expenses through January 27, 2025.

FUND CHARACTERISTICS (as of 11/30/24)

Total Fund Assets	\$1.8 billion
Number of Holdings	365
Average Maturity*	2.57 Yrs
Duration to Worst*	1.56 Yrs
Coupon Rate*	6.08%
Yield to Worst*	5.77%
Effective Duration*	1.35
Spread Duration*	1.47
Distribution Frequency	Monthly accrual
Redemption Fee	30 days / 1.00%

* Based on Shenkman's internal valuations, classifications, and records.

YIELDS (as of 11/30/24)

Share Class	SEC 30-Day Subsidized Yields	SEC 30-Day Unsubsidized Yields
Class I	5.55%	5.51%
Class F	5.50%	5.46%
Class A	5.15%	5.11%
Class C	4.48%	4.45%

The SEC 30-day yield is computed under an SEC standardized formula and is based on the maximum offer price per share. Subsidized yields reflect fee waivers in effect, while unsubsidized yields do not reflect fee waivers in effect.

TOP 10 INDUSTRIES

Name	Fund
1. Automotive	8.32%

8. Media - Broadcasting	3.72%
9. Midstream - Storage & Transport	3.29%
10. Financials - Thrifts & Mortgages	3.22%
Total	51.77%

Mutual fund investing involves risk. Principal loss is possible. There can be no assurance that the Fund will achieve its stated objective. In addition to the normal risks associated with investing, bonds and bank loans, and the funds that invest in them are subject to interest rate risk and can be expected to decline in value as interest rates rise. Investment by the Fund in lower-rated and non-rated securities presents a greater risk of loss to principal and interest than higher-rated securities. Diversification does not assure a profit, nor does it protect against a loss in a declining market. The SEC does not endorse, indemnify, approve nor disapprove of any security.

The Fund invests in foreign securities which involve political, economic and currency risks, greater volatility and differences in accounting methods. Derivatives may involve certain costs and risks such as liquidity, interest rate, market, credit, management, and the risk that a position could not be closed when most advantageous. Leverage may cause the effect of an increase or decrease in the value of the portfolio securities to be magnified and the fund to be more volatile than if leverage was not used.

HIGH YIELD MARKET COMMENTARY

In the past month, U.S. Treasury rates decreased with the 2-year yield falling -2 basis points (bps) and the 10-year yield decreasing by -12 bps. During November, the high yield bond market, as measured by the ICE BofA U.S. High Yield Index (H0A0), returned 115 bps. The month culminated with a yield-to-worst of 7.16%, decreasing 17 bps since October and 53 bps from the start of the year. The H0A0's spread-to-worst came in at 298 bps, decreasing 14 bps since October and 65 bps from the start of the year. The average dollar price of the H0A0 ended the month at 96.40, increasing 0.68 for the month and 3.54 for the year. The higher-quality short duration segment of the high yield market, as measured by the ICE BofA 0-2 Year Duration BB-B U.S. HY Constrained Index (H42C), also posted a relatively strong return for the month, albeit constrained by its stronger credit quality and shorter tenor. The H42C returned 0.67%, while shorter-dated U.S. Treasuries, as measured by the ICE BofA 0-3 Year U.S. Treasury Index (G1QA), delivered a monthly return of 0.31%.

By rating, CCCs outperformed with a return of 1.51%, BBs underperformed with a return of 0.92%, and Bs had a return of 1.01%. By sector, Cable & Satellite outperformed at 2.31%, while Technology underperformed at 0.46%. By duration, the 6-8 year option-adjusted-duration (OAD) bin outperformed while returning 1.59%, as compared to the below 2-year OAD bin which underperformed while returning 0.78%.

The high yield bond default rate declined to 0.34% in November, and the leveraged credit default rate, which includes bonds and loans, increased to 0.94%. The upgrade-to-downgrade ratio for U.S. high yield came in at 0.78:1 for the month. New issuance decreased to \$10.4 billion, down from \$23.7 billion in October. The market also saw approximately \$800 million of "Rising Stars" and no "Falling Angels" over the month.

FUND COMMENTARY

The Shenkman Short Duration High Income Fund (the "Fund") (SCFIX) posted a return of 0.67% for the period, trailing the broader high yield market, as measured by the H0A0, while outpacing shorter-dated U.S. Treasuries. Fund performance by credit rating largely echoed the broader high yield market's pattern, with CCC-rated credits posting the strongest returns while BB-rated credits modestly trailed the overall Fund performance. On a sector basis, all returns were positive with Leisure, Gaming, Travel and Industrials posting the strongest contributions to absolute returns while Real Estate and Utilities posted the weakest contributions. The Fund's duration-to-worst rose to 1.6 years while the Fund's average bond price ticked higher to \$99.8. The Fund's average final maturity rose to 2.6 years, while primary issuance and refinancing declined for a second consecutive month from its highest volume year-to-date. Corporate action activity in the Fund also decelerated from October. During the month, 7 bonds were called or tendered, representing \$50.0 million in proceeds (approximately 2.9% of the Fund's average market value) which were redeployed in other short duration opportunities at what we believed were relatively attractive levels given the continued discount price environment. The Fund continues to seek compelling risk-adjusted return opportunities and strong credit selection as it remains mindful of liquidity risks.

Through the month of November, the high yield bond market seemed to mirror the equity rally, though to a lesser degree as most markets seemed relieved to put the election in the rearview and revel in the potential for deregulation and growth potential of a second Trump term. Conversely, Treasury yields surged in the days following the election on the prospect of potential increased spending, which pushed high yield bond option-adjusted-spreads to the lowest level since 2007 and investment grade option-adjusted-spreads to a quarter century nadir. We believe the broad-based credit risk of the high yield market seems to be mitigated in large part by companies addressing upcoming maturities with new debt issuance, also evidenced by the current default rate of just 0.34%. Currently, on a relative basis, the high yield bond market appears stable given its low exposure to LBOs as compared to the bank loan market (as measured by the Morningstar LSTA US Leveraged Loan Index) and with the recent dampening of expectations for lower cost of capital for companies with floating rate debt. However, despite refinancings dominating much of the new high yield issuance, there was an uptick in M&A financing transactions in both the high yield bond and loan markets. We believe the opportunity for further M&A was amplified by the Trump win as regulatory scrutiny is likely to subside. With the election settled and year-end rapidly approaching, we believe focus is likely to shift back to the Fed in the coming months. We continue to believe the higher-quality short duration segment of the high yield market remains well positioned as a lower volatility solution with the ability to seek to capture attractive risk-adjusted returns in the current environment.

IMPORTANT DISCLOSURES

The Shenkman Group of Companies (the "Shenkman Group") consists of Shenkman Capital Management, Inc., and its affiliates and subsidiaries, including, without limitation, Shenkman Capital Management Ltd, Romark Credit Advisors LP, and Romark CLO Advisors LLC. The Shenkman Group focuses on the leveraged finance market and is dedicated to providing in-depth, bottom-up, fundamental credit analysis.

Shenkman Capital Management, Inc. ("Shenkman" or "Shenkman Capital") is registered as an investment adviser with the U.S. Securities and Exchange Commission (the "SEC"). Romark Credit Advisors LP is also registered as an investment adviser with the SEC and Romark CLO Advisors LLC is registered as a relying adviser of Romark Credit Advisors LP together, "Romark"). Shenkman Capital Management Ltd is a wholly-owned subsidiary of Shenkman Capital Management, Inc. and is authorized and regulated by the U.K. Financial Conduct Authority. Such registrations do not imply any specific skill or training. **E-A Investors:** This material is provided to you because you have been classified as a professional client in accordance with the Markets in Financial Instruments Directive (Directive 2014/65/EU) (known as "MiFID II") or as otherwise defined under applicable local regulations. ICE BofA and its licensors accept no liability in connection with this its use. See <https://www.shenkmancapital.com/terms-service/> for a full copy of the Disclaimer. One can not invest directly in an index.

The VIX Index is a measure of implied volatility in the stock market that is calculated on the basis of short-term index options on the S&P 500 Index. A high VIX index signals anxiety and fear in the market and typically occurs after a sharp decline in stock prices. A low VIX index generally follows calm markets and rising prices.

Basis point (BPS) is a value equaling one one-hundredth of a percent (1/100 of 1%).

The Consumer Price Index (CPI) is a measure that examines the weighted average of prices of a basket of consumer goods and services, such as transportation, food, and medical care.

Coupon is the periodic interest payment made to the bondholders during the life of the bond. Prepayment risk refers to payments made in excess of scheduled mortgage principal repayments.

Coupon rate is the nominal yield paid by a fixed-income security. It is the annual coupon payments paid by the issuer relative to the bond's face or par value.

Duration is a measure of the sensitivity of the price of a fixed-income investment to a change in interest rates; it is expressed as a number of years.

Duration-to-worst is the duration of a bond computed using either the final maturity date, or a call date within the bond's call schedule, whichever would result in the lowest yield to the investor.

Effective duration is a duration calculation for bonds with embedded options. Effective duration takes into account that expected cash flows will fluctuate as interest rates change.

The European Central Bank (ECB) is the central bank responsible for monetary policy of the European Union (EU) member countries that have adopted the euro currency.

A fallen angel is a bond that was once rated as investment grade but has fallen to junk-bond status because of the issuing company's poor credit quality. A rising star is a bond that is rated as a junk bond but could become investment grade because of improvements in the issuing company's credit quality.

Mergers and acquisitions (M&A) is a general term that refers to the consolidation of companies or assets through various types of financial transactions. M&A can include a number of different transactions, such as mergers, acquisitions, consolidations, tender offers, purchase of assets and management acquisitions.

Option Adjusted Duration (OAD) is a measure that helps approximate the degree of price sensitivity of a bond to changes in interest rates adjusted for the option to call or put.

Option Adjusted Spread (OAS) is the measurement of the spread of a fixed-income security rate and the risk-free rate of return, which is adjusted to take into account an embedded option.

Par - The term at par means at face value. A bond, preferred stock, or other debt instruments may trade at par, below par, or above par.

Tenor refers to the length of time remaining before a financial contract expires.

S&P ratings represent Standard & Poor's opinion on the general creditworthiness of a debtor, or the creditworthiness of a debtor with respect to a particular debt security or other financial obligation. Ratings are used to evaluate the likelihood a debt will be repaid and range from AAA (excellent capacity to meet financial obligations) to D (in default). In limited situations when the rating agency has not issued a formal rating, the security is classified as non-rated (NR).

Spread is the percentage point difference between yields of various classes of bonds compared to treasury bonds.

Spread-to-worst (STW) measures the dispersion of returns between the best and worst performing security in a given market, usually bond markets, or between returns from different markets.

Yield-to-Maturity is the rate of return anticipated on a bond if it is held until the maturity date.

Yield-to-Worst is the lowest possible yield from owning a bond considering all potential call dates prior to maturity.
